Problem

① Safety

A certain segment of people do not feel comfortable travelling with total strangers. Especially women who need to travel during odd hours have concerns of safety.

② Time

There could be sudden instances like change in office timings or late overstay in office, etc.which may affect your routine travel plans.

③ Cost

Sharing a car ride with other people means sharing the fuel costs. There could be additionalcharges also involved like car maintenance, tyre puncture, etc. Travelers registering online are always curious to know the payment distribution terms beforehand to avoid conflicts later.

Solutions

Safety

Chat

Members can start chat before the ride start that will make them to know each other rather than be a stranger
